

Locum Neurologist: Cave Veterinary Specialists, Somerset, UK

Cave Vet Specialists is a rapidly expanding, multi-disciplinary, small animal referral only centre based in the south west of the UK. We occupy a purpose built modern facility and accept referrals in neurology, internal medicine, oncology, soft tissue surgery, orthopaedics, cardiology and dermatology. These services are supported by specialists in anaesthesia, diagnostic imaging and a large nursing team.

Current on site imaging facilities include a Hallmarq 1.5T MRI, a GE 16 slice BRIVO CT with pressure injector, Konica CR, digital GE C-arm, and Ultrasound with an integrated PACS system. We also have equipment for electrophysiology.

Due to a rapidly increasing caseload we are looking for a boarded or board eligible neurologist to join our team of three neurologists and neurology intern for an initial period of 9-12 months starting in August 2019, with scope for extension of the position.

The practice is located in the beautiful British West Country (<http://www.visitsouthwest.co.uk/>) at the foot of the Blackdown hills, an area of outstanding natural beauty, with Exmoor national park and the Quantocks hills a short distance away and rapid access to all that the south west of England offers in outdoor pursuits. The county town of Taunton is 6 miles away with direct train links into London Paddington. Bristol (45 minutes) and Exeter (30 minutes) airports are easily accessible.

We are offering a very competitive salary including private medical insurance, relocation expenses, professional fees and continuing education. Ideally we are looking for full time (4 day working week) but would consider part time to suit the candidate's circumstances. We offer 6 weeks annual leave.

For an informal discussion or to apply please contact Tom Cardy (tcardy@cave-vet-specialists.co.uk) or Tom Cave (tcave@cave-vet-specialists.co.uk).
