

Wrocław, 2018-12-16

Dear Sponsor

It is a pleasure for me to contact you regarding the **32th Annual Symposium of the European Society of Veterinary Neurology (ESVN/ ECVN)**, which is taking place in **Wrocław, Poland on 13-14 September 2019**. This year main topic is **“Can you image-ine that? - Veterinary Neuroimaging”**.

The ESVN congresses are world-wide known as the top quality meeting of professionals in veterinary neurology. From years ESVN is observing an increasing interest and amount of participants. The meeting 2019 is expected to gather approx. 400-450 participants including veterinary professionals, diplomates, residents-in-training, as far as general practitioners from all over Europe and abroad. All of them are interested in veterinary neurology and advanced diagnostic imaging development.

It's a pleasure for me to invite you to take part in this successful event as a sponsor to take the advantage of this meeting in presenting your products that could be used in this unique veterinary medicine field.

About the congress localization

The congress in 2019 is going to take place in Wrocław, that is a charming, multicultural and historically very interesting city, localized in western Poland. The issue itself is going to be held in the City Opera and the ceremony opening in City Hall. There will be a very good occasion for networking at the Jazz club “Vertigo”, as far as during the gala dinner at Topacz castle.

Why sponsor a congress focusing on veterinary neurology?

The ESVN/ECVN congress 2019 in Wrocław is going to gather highly profiled veterinarians in the field of neurology and advanced diagnostic imaging as far as general practitioners. These dedicated clinicians from Europe and abroad work with complicated neurological cases of companion animals. Those patients require multilevel diagnostic work-up including routine blood examination, serological assays, electrodiagnostic examination or cerebro-spinal fluid assessment.

Imaging diagnostic including routine and advanced techniques (X-ray, ultrasound, MRI, CT) play a crucial role in forming a proper diagnosis and therapeutic decision.

The congress is dedicated in development of therapeutic procedures including medical and dietary treatment. Those patients require implementation of well-planned general care, pain-treatment or physiotherapy.

For contact & questions regarding our congress please contact me directly: marcin.wrzosek@upwr.edu.pl, phone +48 607 161 202.

On behalf of the ESVN/ECVN & Local Organizing Committee

Marcin Wrzosek
